

MOBILITY

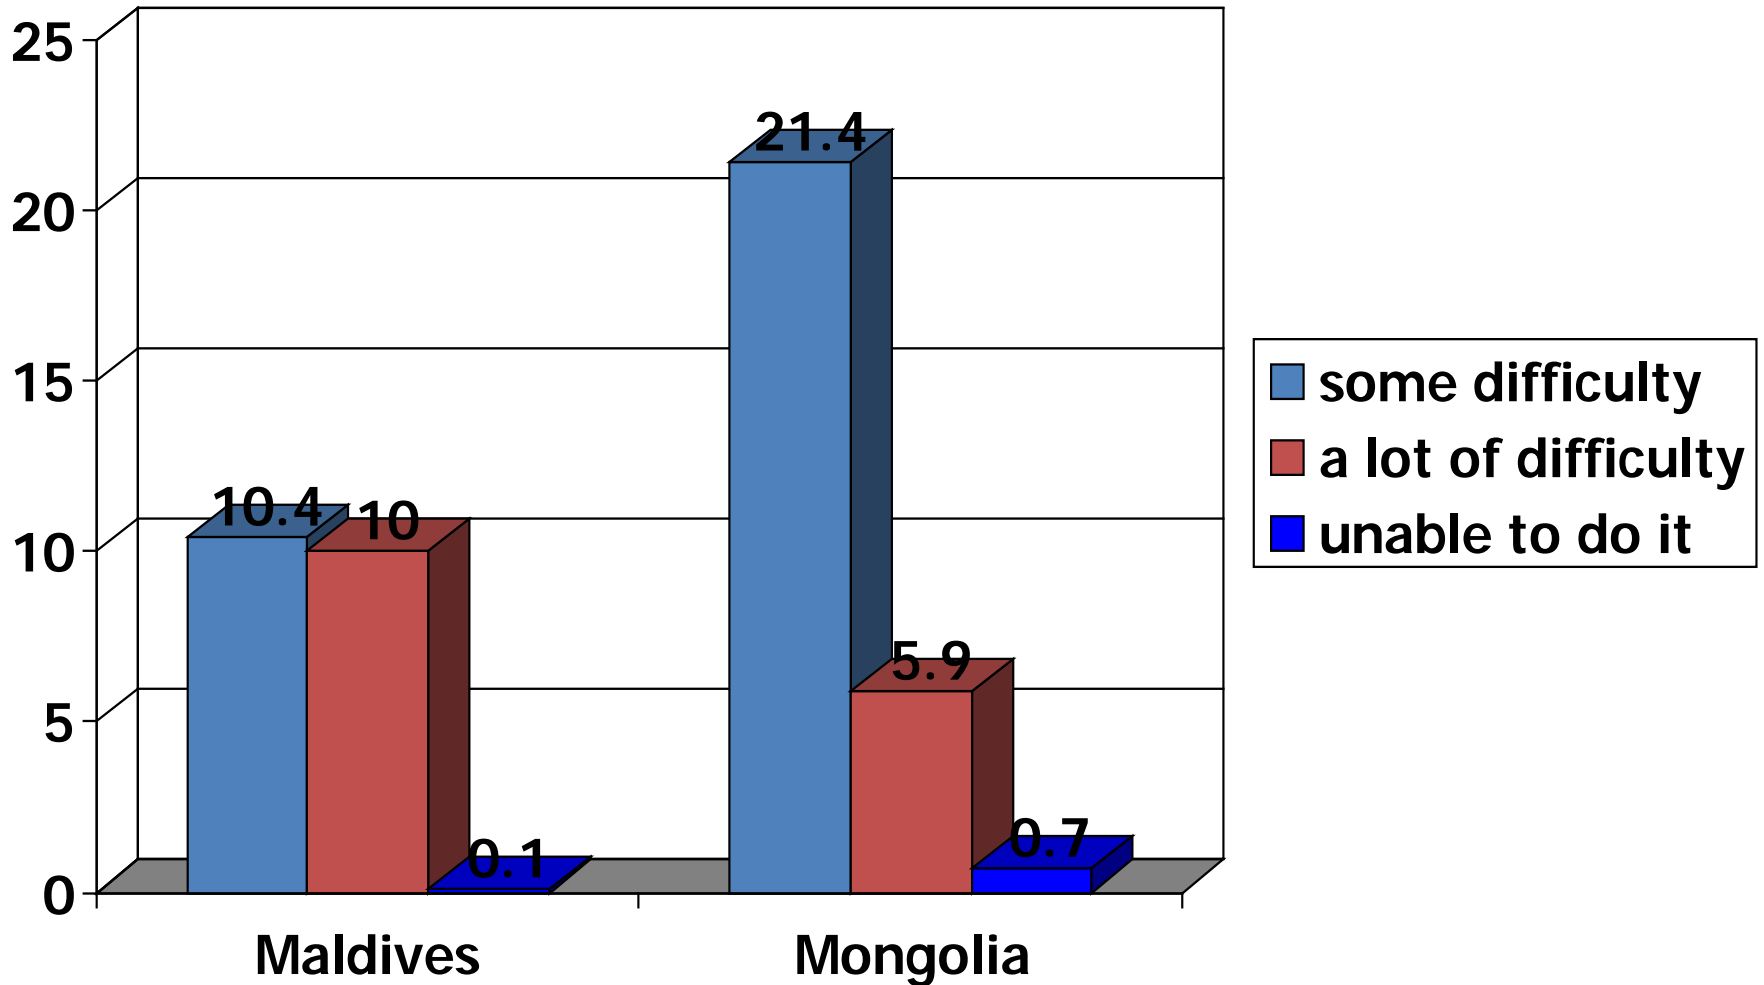

MONGOLIA: Mobility - Cognitive Testing

- Findings from Cognitive Testing:
 - *Question 3.6*: Some respondents were confused and expressed that 12 steps of stairs and small hills are not comparable to each other and needs to be clarified about what kind of hills are considered as a “small” hill?

MONGOLIA: Mobility Field Test

- Findings from Field Testing:
 - Climbing small hills (12 steps of stairs not same understanding for rural areas)
 - Well-known places of the city are used for 100 and 500 meters distances (football field and city block)

Mobility Field Testing: Country prevalence

Mobility field test

		some	a lot	can't do
SS:	walking or climbing steps	21.2	5.9	0.7
MOB_1	moving around	5.6	2.7	0.4
MOB_4	100 m on level ground	7.7	1.8	0.7
MOB_5	500 m on level ground	12.7	4.8	0.2
MOB_6	walking up, down 12 steps	20.6	5.7	0.8
P_MOB_6	up or fown without using handrail	20.0	4.5	1.9

Mobility field test

MOB_2: Do you use any equipment or receive help for getting around? **(6.5%)**

		some	a lot	can't do
MOB_7	100 with aid	1.1	0.4	0.2
MOB_8	500 with aid	1.1	0.7	0
MOB_9	12 steps with aid	0.8	0.9	0.1

Mobility field testing

- Labour protection(security issue)
- Assistive device
- Friendly environment
- Work possibilities
- Policy implications
- Government initiative
